

Instructions for Your Web Project

1. Check Software Requirements

- Ensure that **Visual Studio Code** (if necessary) is installed on your computer.
 - If you don't have it, you can [download it here](#).
-

2. Locate Your Assigned Country

- Open the PDF file titled **Students and Recipes.pdf**.
 - Find the country assigned to you.
-

3. Research a Recipe

1. Using a search engine, find a recipe from your assigned country.
 - You may use the suggested recipe in the third column of the **Students and Recipes PDF** or select a different one.
 2. If you select a different recipe, update the **Word document** shared in the **General channel**.
-

4. Gather Content

- Copy **500–700 words** of content related to the recipe you've chosen.
 - Find a **YouTube video** about the country or the recipe and include it on your website.
-

5. Read the Web Project Instructions

- Open the PDF file titled **Web Project Instructions.pdf**.
 - Read it thoroughly to understand the design and functionality requirements for your website.
-

6. Create Your Website

1. Use **HTML** and **CSS** to build your website.
 2. Follow the specifications outlined in the **Web Project Instructions** document.
 3. Your website must include **15 design elements** as described in the document.
-

7. Organize Your Files

- Create the following folder structure for your project:

```
webproject/  
  index.html  
  css/
```

```
superstyle.css
images/
```

8. Compress Your Project

- Once your website is complete, compress the entire **webproject** folder into a ZIP file.
- Name the ZIP file **webproject.zip**.

Steps to Compress the Folder:

- **On Windows:**
 - Right-click the folder and select **Send to > Compressed (zipped) folder**.
 - **On macOS:**
 - Right-click the folder and select **Compress "webproject"**.
-

9. Submit Your ZIP File

- Ensure that your ZIP file includes all necessary files and folders from the **webproject** folder.
 - Submit the file as instructed.
-
